Internal Newsletter For

ORACLE AUTONOMOUS DATABASE
ON SHARED EXADATA INFRASTRUCTURE

April 19, 2021

Autonomous Database Shared development and product management teams are pleased to announce the following updates:

→ **PeopleSoft on ADB** → **OML Briefing Note**

→ **Using Graph With ADB** → **Enhancements to Data Pump Support**

→ **Using Spatial With ADB** → **Global Leaders Update**

Autonomous Database Shared feature roadmap for Q4-FY21 / Q1-FY21 is **here**.

Internal monthly Database Cloud New Features webcasts are here **here**.

(Shared Infrastructure)

ORACLE®
PEOPLESOFT

PeopleSoft Now Certified On Autonomous Database

Oracle PeopleSoft announced certification of PeopleSoft 9.2 products on OCI Autonomous Database – Shared. To run Oracle PeopleSoft 9.2 on OCI ADB-S, following are the required minimum PeopleTools versions and patch levels:

- PeopleTools 8.57 Jan '21 CPU (Patch 20)
- PeopleTools 8.58 Jan '21 CPU (Patch 09)
- PeopleTools 8.59 (GA planned this week) – latest version of PeopleTools.

Note: Certification for Oracle PeopleSoft 9.2 products on OCI Autonomous Database – Dedicated was announced last year in July.

ORACLE GRAPH + ADB
(Shared Infrastructure Only)

Using Oracle Graph with Autonomous Database

The documentation has been updated to provide more information about using Oracle Graph with ADB and this includes details about specific restrictions that apply to ADB.

Oracle Graph with Autonomous Database enables you to create graphs from data in your Autonomous Database. With graphs you can analyze your data based on connections and relationships between data entities.

ORACLE SPATIAL + ADB
(Shared Infrastructure Only)

Using Oracle Spatial with Autonomous Database

The documentation has been updated to provide more information about using Oracle Spatial with ADB and this includes details about specific restrictions that apply to ADB.

Oracle Spatial Database is included in Autonomous Database, allowing developers and analysts to get started easily with location intelligence analytics and mapping services.

LEARN

DOC: Using Oracle Spatial with Autonomous Database **click here**

POSITION

Target audience is cloud architects, developers and spatial analytics SMEs.

MACHINE LEARNING
(Shared Infrastructure)

Briefing Note For Oracle Machine Learning

This document provides an overview of features and enhancements included in Oracle Machine Learning. It is intended solely to help you assess the business benefits of leveraging the Oracle data management and analytics platform with Oracle Machine Learning to plan your data-driven data science, machine learning, and information technology projects.

To download, **click here**.

POSITION

This technical brief is intended for executives, LOB managers, and practitioners who are looking to provide scalable machine learning capabilities to the data scientists, data analysts, data engineers, and application and dashboard developers across their enterprise.

DATA PUMP
(Shared Infrastructure Only)

Enhancements To Support For Data Pump

To support using Oracle Data Pump Import to import a dump file set to a target database, you can use a script that supports substitution characters to download all the dump files from your Object Store in a single command.

DOC: Download Dump Files, Run Data Pump Import, and Clean Up Object Store, **click here**.
