Autonomous AI Database *Fully-Managed Cloud-Native Data Platform*

Name

Title

Agenda

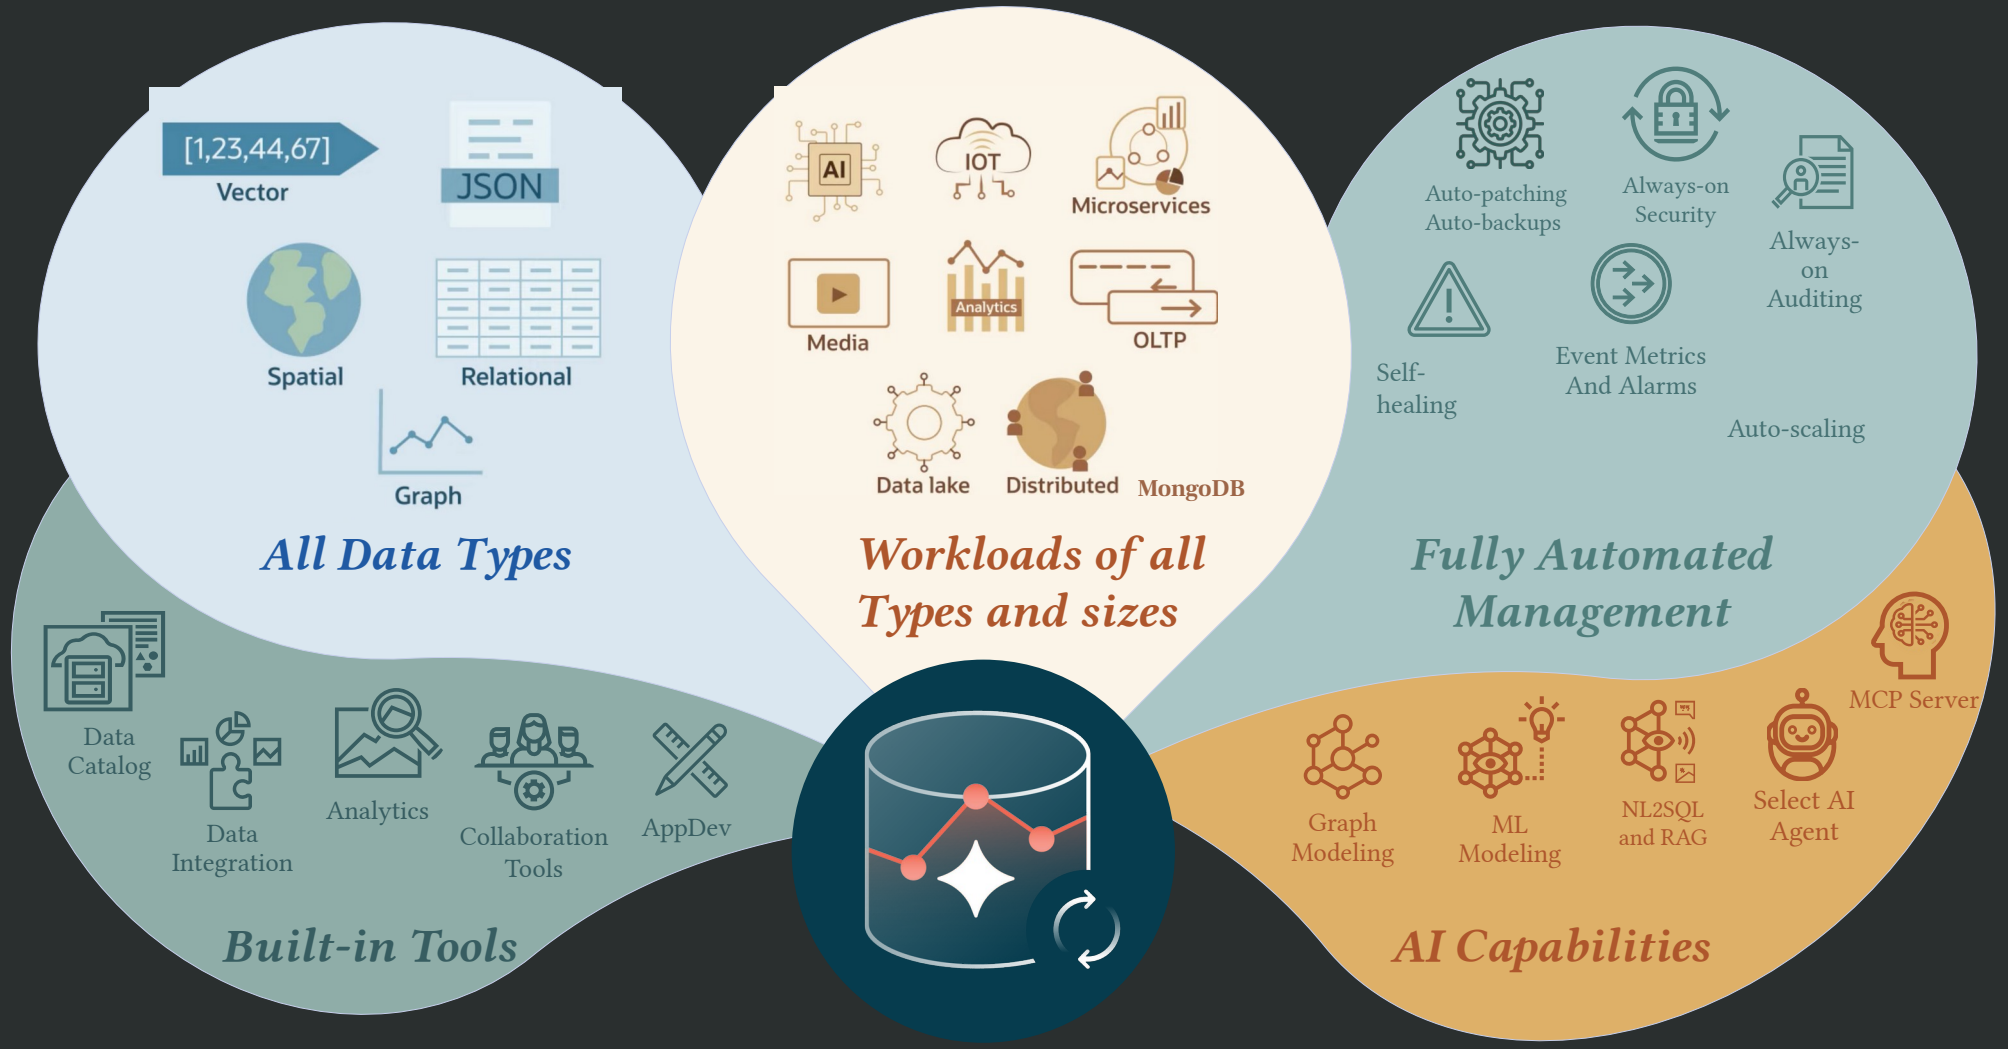

Oracle Autonomous AI Database

- Introduction
- Features and benefits
- Build new modern applications
- Manage all your data
- Conclusions

What is Oracle Autonomous AI Database?

Modern, fully-managed, cloud-native, AI-enhanced data platform that automates data management.

Copyright © 2026, Oracle and/or its affiliates

What can Autonomous AI Database do for you?

Simplify, Secure and Modernize Data

Lower costs

- Lower costs using one fully automated database
- Automated database admin
- One database service for every workload
- Scale elastically and pay only for what you need

Minimize Risk

- Minimize data security risks and downtime
- Automated threat detection and response
- 99.995% application availability
- Automation reduces security and downtime risks

Empower Developers

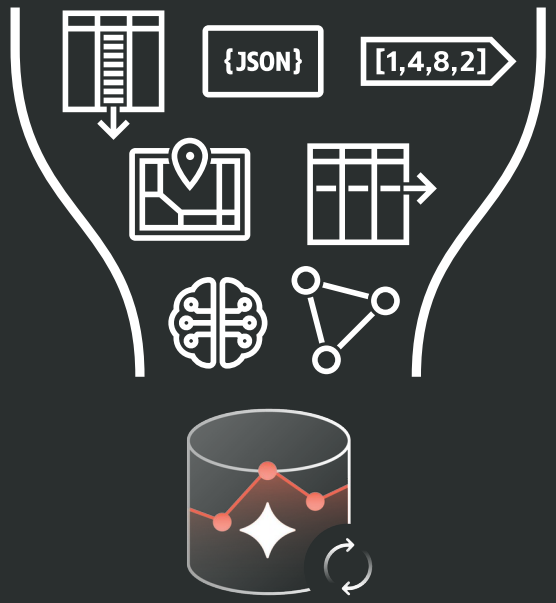

- Empower your developer community and business teams
- Query data with natural language
- Use AI on all of your data with AI Vector Search
- Build and manage AI Agents, including pre-built ones like a Data Science Agent

Copyright © 2026, Oracle and/or its affiliates

Autonomous AI Database is flexible

Optimized for all workloads and data types

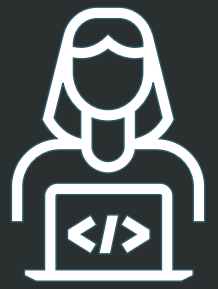

ANY DATA

No need to maintain specialized databases

Innovate with all types of data within a single database

ANY DEVELOPMENT STYLE

Use your development styles and frameworks of choice

Innovate with zero-code/low-code to any-code using built-in frameworks

ANY WORKLOAD

No need to manually optimize for your workload

Innovate regardless of workload – apps, analytics, AI/ML, or mixed

Copyright © 2026, Oracle and/or its affiliates

Autonomous AI Database runs where you need it

Runs everywhere, in all Clouds

Autonomous AI Database has a simple price structure

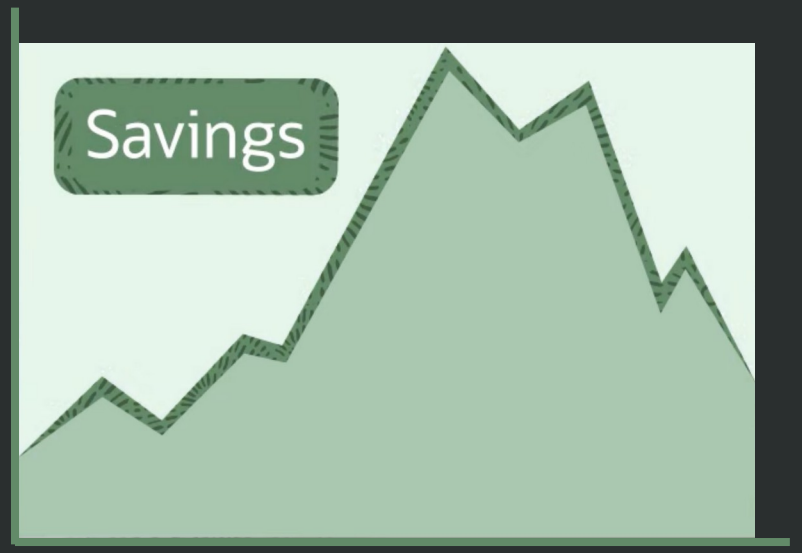

Pay As You Go or Universal Credits

Flexibility and Elasticity: Pay per Database

- Start at 2 ECPU's, scale elastically
- Each database is billed independently
- Available as license-included or BYOL*

Even more savings: Consolidate Workloads

- Aggregate dozens of hundreds of databases into a single bill with Elastic Pools
- Starts at 128 ECPU's
- Up to 4-8x cost savings vs per-database pricing
- No changes to database functionality, scalability or performance

CPU Usage over Time

** BYOL: Bring your existing Oracle licenses and get 75% discount; And it includes all Database Options at no additional cost*

Copyright © 2026, Oracle and/or its affiliates

Agenda

Oracle Autonomous AI Database

- Introduction
- Features and benefits
- Build new modern applications
- Manage all your data
- Conclusions

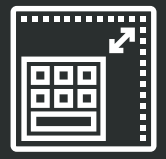

Autonomous AI Database brings Automation

Automatically secures, tunes, and scales

Automated **patching** and **security**

Automated **scaling**

Automated **backups** and **failover**

Automated **provisioning**

Automated **configuration**

Automated **tuning**

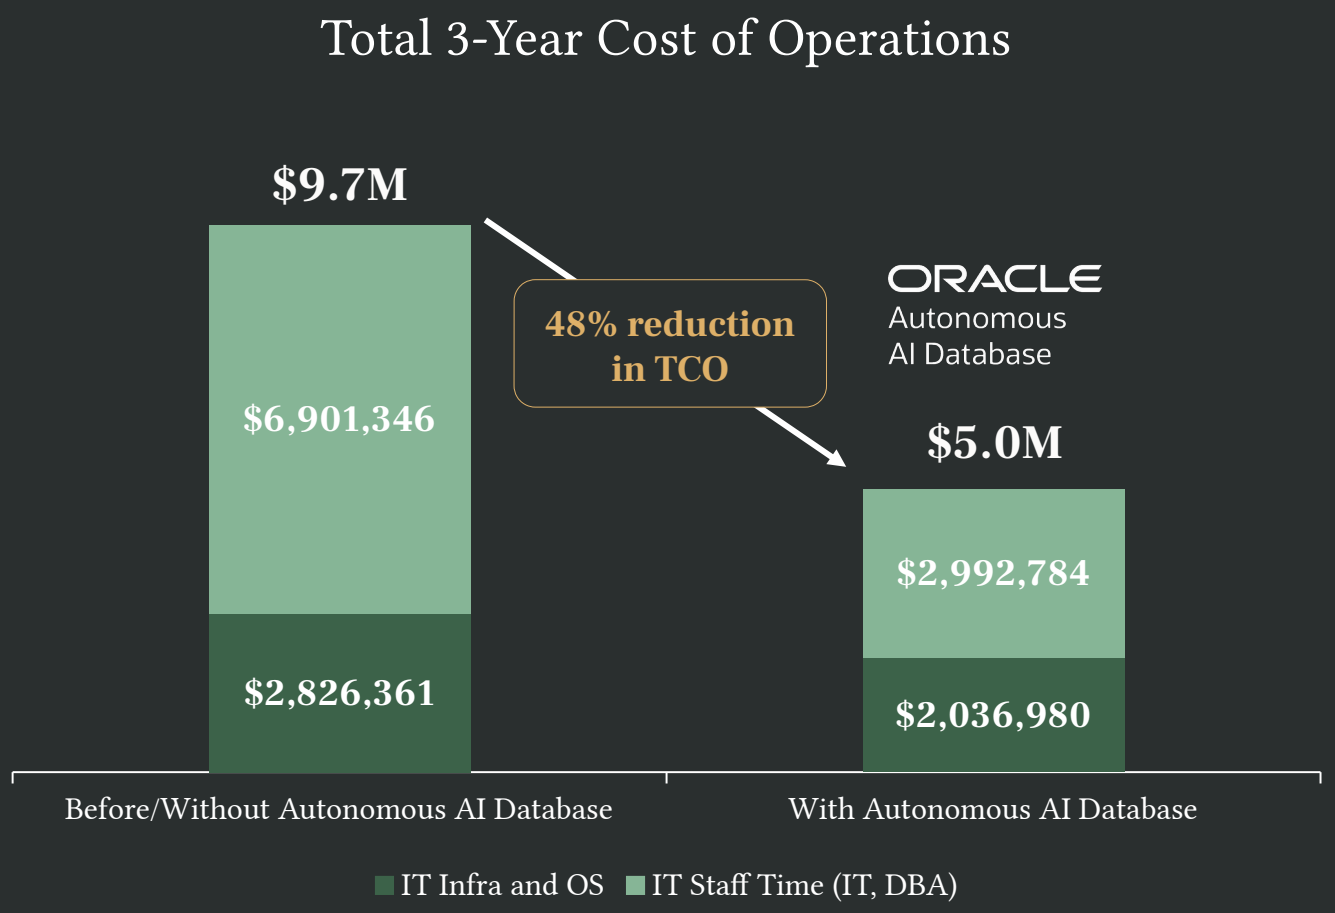

Up to **65%** reduction in manual administration*

Up to **99.995%** SLA ◆ **Zero** regression SLO

*As compared to non-managed Oracle Databases

Autonomous AI Database lowers TCO for every customer

$103,000
Average annual benefit per Autonomous AI Database

436%
Three-year return on investment

5-month
Payback on investment

Autonomous AI Database is Trusted

Oracle SaaS runs on Autonomous AI Database

ORACLE Fusion Applications

Fusion EPM, Warehouse Management, CX Unity and newly-provisioned Fusion suite use Autonomous AI Database ***today***

Existing Fusion customers migrating in 2026 -- a total of more than 24,000 Databases

---

ORACLE NetSuite

NetSuite uses Autonomous AI Database *today*

Over 4,700+ customer Databases already migrated

ORACLE Industries

Oracle Industries (vertical apps) have 117 cloud services certified on Autonomous AI Database ***today, with 788k+ customers migrated*** *and* ***7,000+ Autonomous AI Database instances***

All strategic Oracle Industries cloud services to run on Autonomous AI Database

Copyright © 2026, Oracle and/or its affiliates

Autonomous AI Database is Secure

Automated patching

Hands-free patch management with zero downtime and no interruption of service

Data compliance

Meets a broad set of international and industry-specific compliance standard

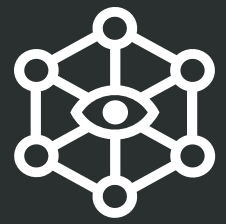

Link to

regulatory compliance certification list

Enhanced Security

Automated always-on data encryption, auditing, and ability to protect sensitive and regulated data

AI Security

Oracle's **zero-trust** model for data access: Select AI. Control for blocking LLM access to the data, no matter the prompt.

Autonomous AI Database makes Migration Easy

Simplified planning and migration operations

1 Explore

- Evaluate your entire Oracle Database estate
- Review the effort to migrate each Oracle Database

Estate Explorer

Evaluate DB Links

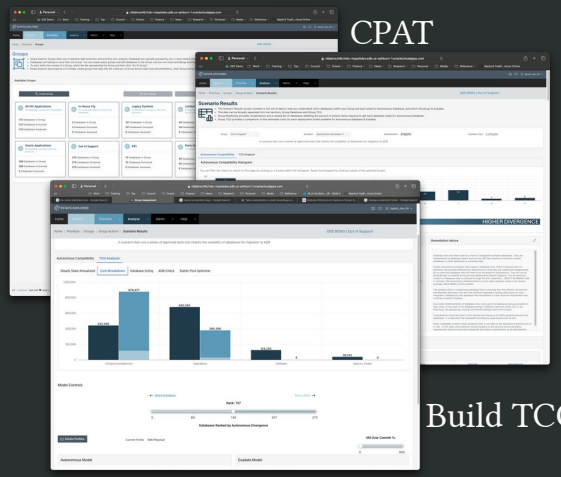

Simulate Elastic Pools

2 Plan

- Prioritize Database migrations
- Simulate TCO for a Technical Business Case by comparing options

Estate Explorer

CPAT

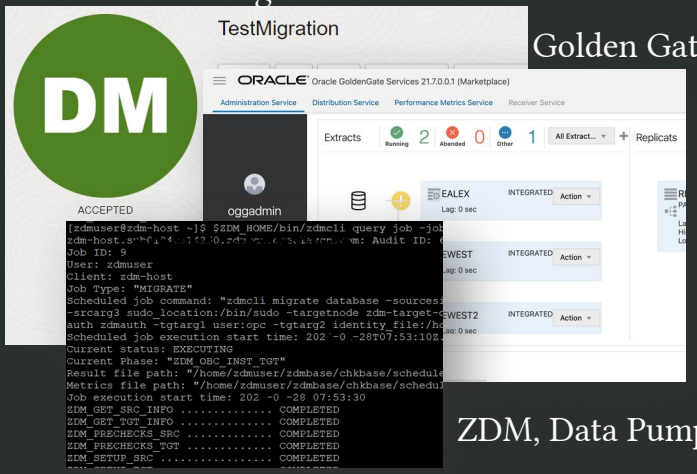

Build TCO

3 Migrate

- Use a variety of tools for different migration use cases
- Migrate even from older releases of Oracle DB (11g and up)

OCI Database Migration Service

Agenda

Oracle Autonomous AI Database

- Introduction
- Features and benefits
- Build new modern applications
- Manage all your data
- Conclusions

The Oracle AI Database includes dozens of new AI capabilities

In-Database ONNX Vector Creation

Hybrid Vector Indexes

ORACLE AI Database

IVF Flat Indexes

Chainable Utility Functions for Vectors

GoldenGate Distributed AI

HNSW vector Indexes

LLM Integration

AI Private Agent Factory

AI Developer Role

Automatic Accuracy Calibration

{JSON}

Vector Support in JSON/OSON

Private AI

Over 30 Machine Learning Algorithms

Vector Search with LangChain

AI Vector Search

LlamaIndex Support

7 1 4 9

Sparse, Dense, and Binary Vectors

Exadata AI Smart Scan

External Table Support for Vectors

Integration with LangGraph

Custom Distance Functions

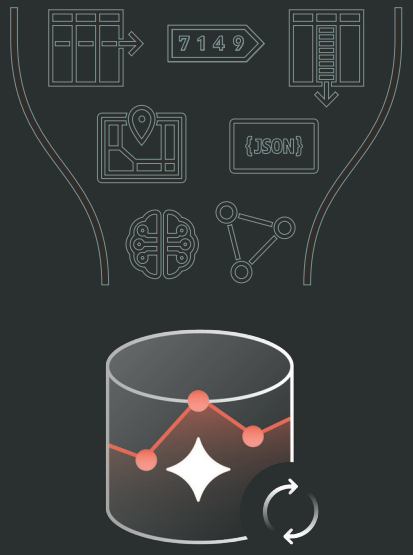

Agentic RAG

Copyright © 2026, Oracle and/or its affiliates

Autonomous AI Database brings additional features on top of AI

Complete data ecosystem in a single cloud service

Converged Database

Low-Code Development

APEX

Powerful Interfaces (beyond SQL)

REST Services

MongoDB API

Python

Built-in Tools

SQL Worksheet

JSON Worksheet

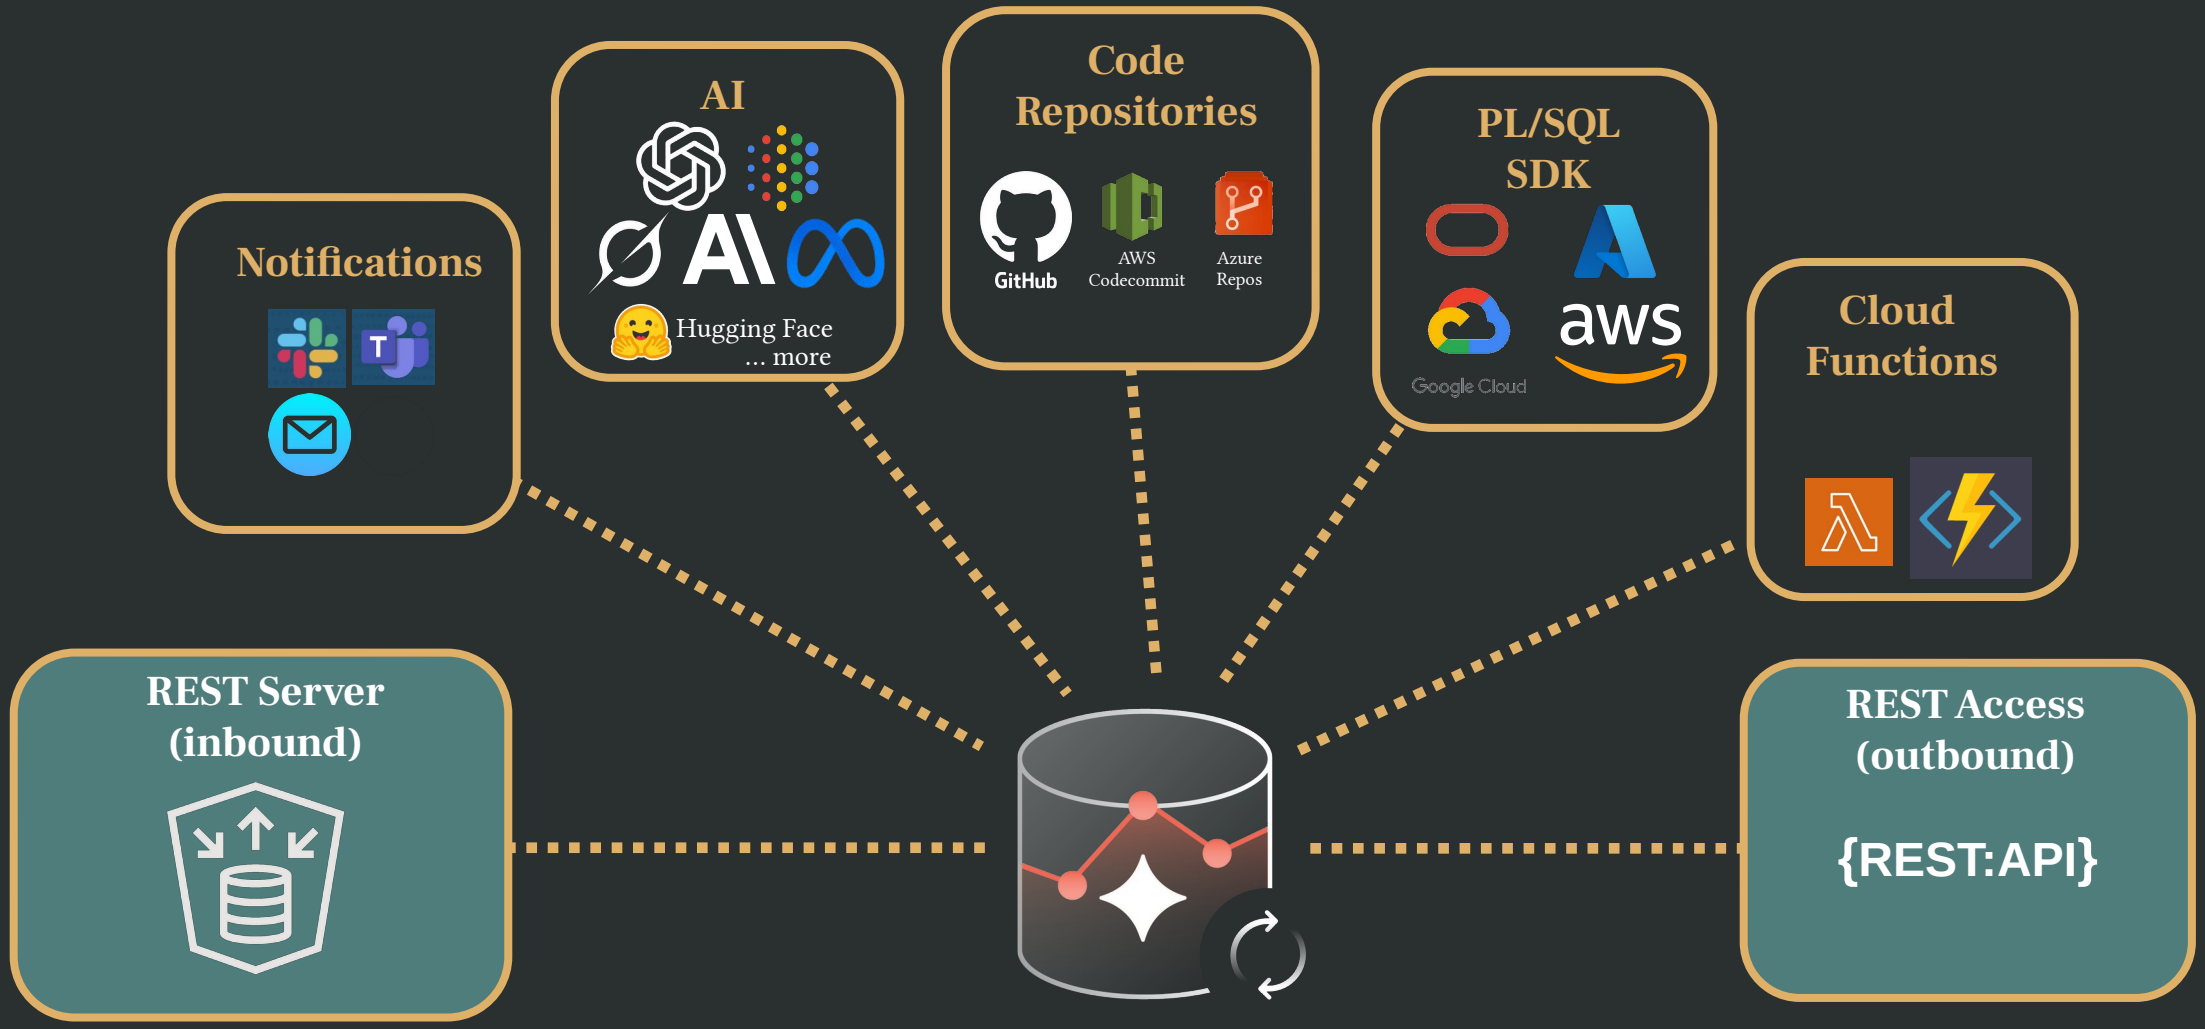

ML Notebooks + AutoML UI

Graph Studio

Copyright © 2026, Oracle and/or its affiliates

Autonomous AI Database provides native Cloud Integration

Built-in capabilities to communicate with all major Cloud Interfaces and Tools

Copyright © 2026, Oracle and/or its affiliates

Autonomous AI Database includes Specialized APIs

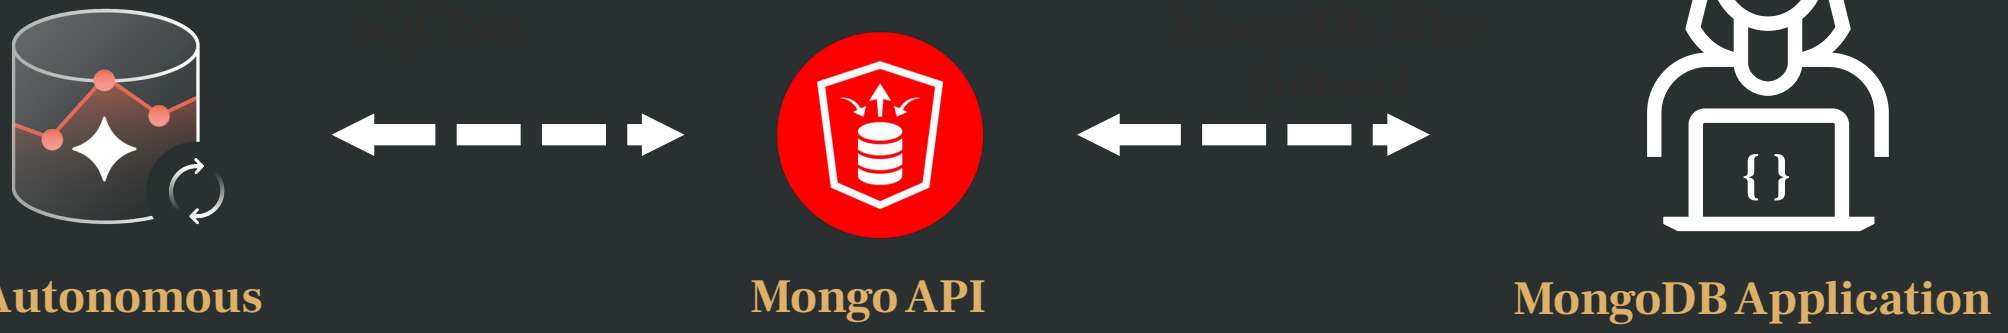

Example: API for MongoDB to ease Development

Developers can continue to use MongoDB's tools, drivers, frameworks

- MongoDB collection is transparently backed by table with JSON column

Enable SQL and Oracle Database ecosystem on JSON collection

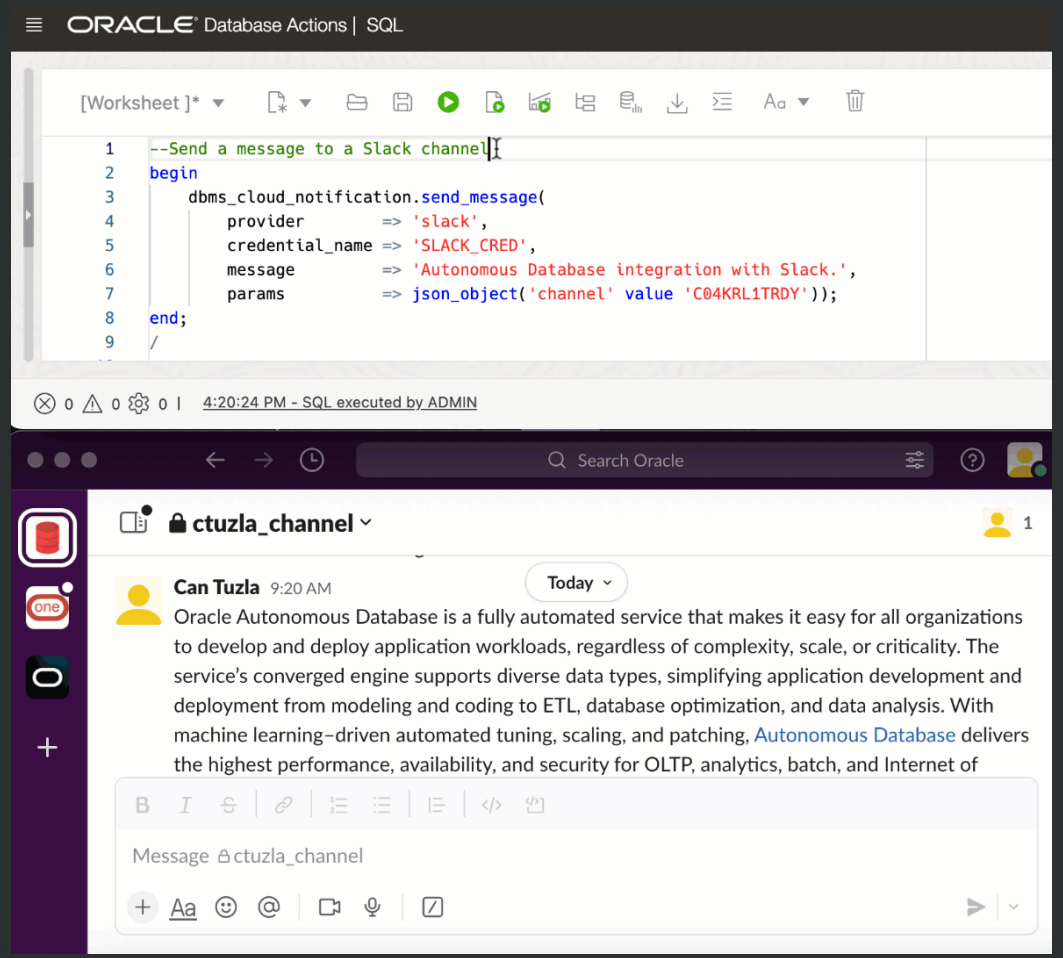

- Query JSON alongside other data models: relational, XML, spatial, etc
- Strong analytical capabilities, machine learning
- Expose relational data, reports, query results as MongoDB collections

Copyright © 2026, Oracle and/or its affiliates

Autonomous AI Database integrates with Productivity tools

Example: Integration with Slack (Integration with Microsoft Teams also available)

Send messages directly to Slack

- Query Results
- Text Messages

Example usage:

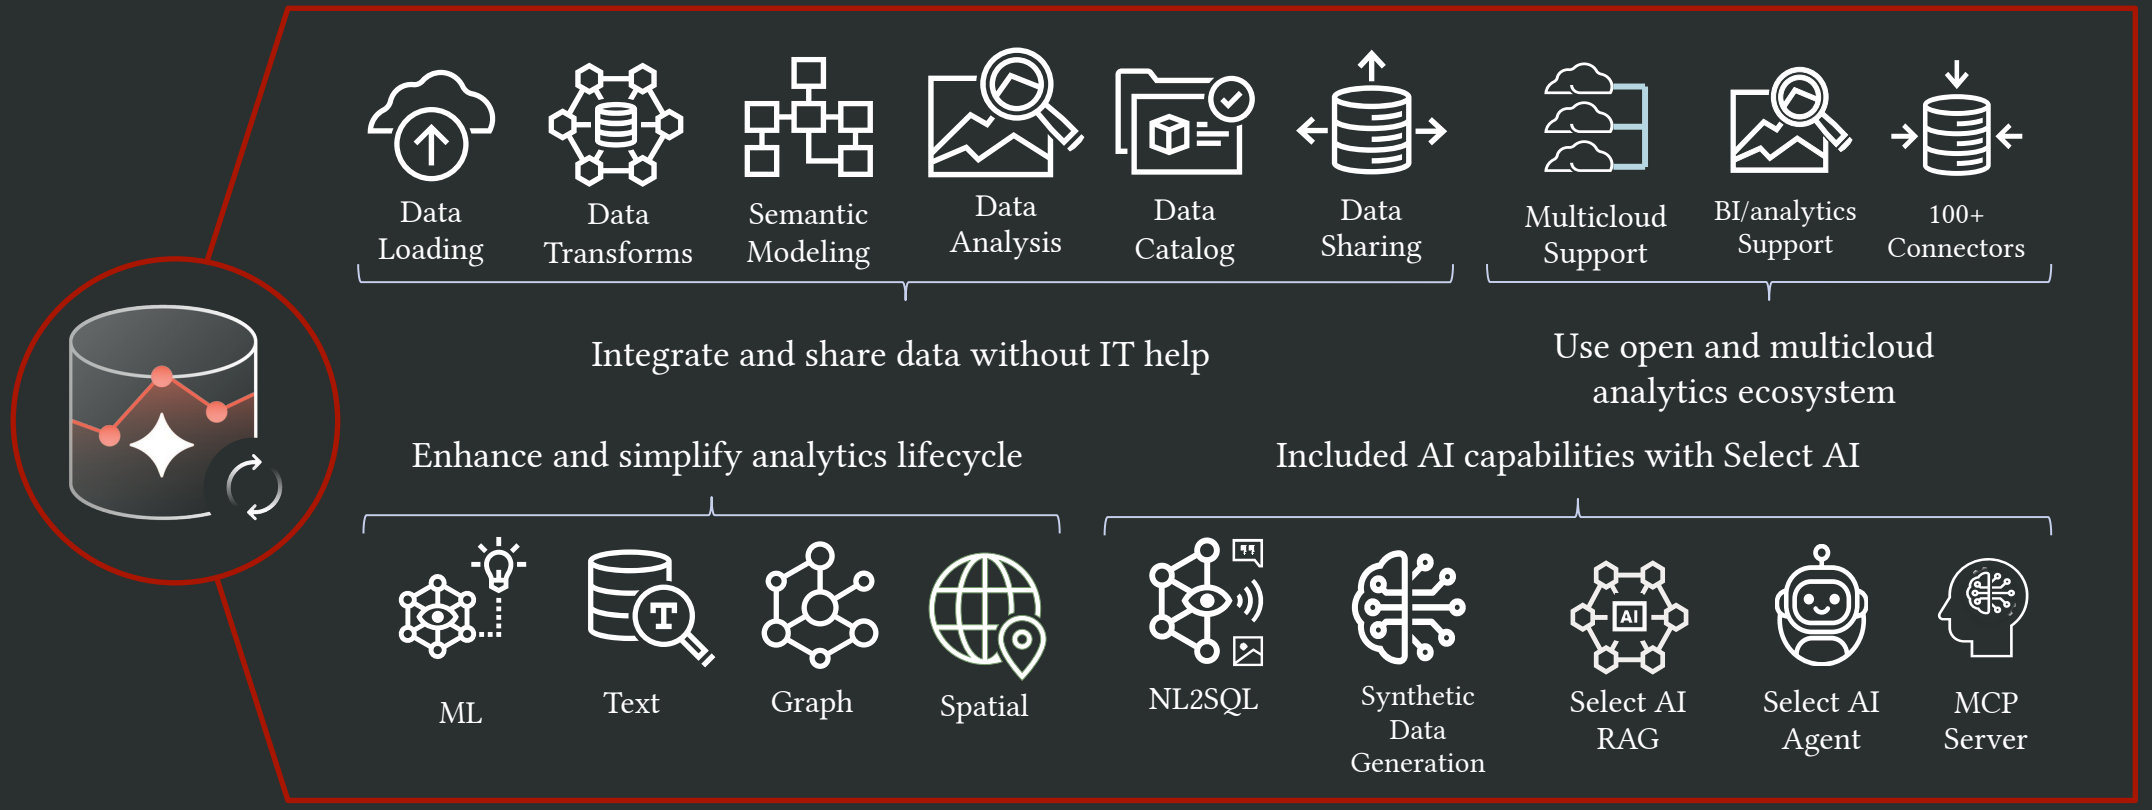

- Operational notifications and alerts
  "Daily load job is complete"
- Data reports and alerts
  "New customer order from ABC Corp: $10,000"

•Slack messages can be sent from any database function or procedure

Copyright © 2026, Oracle and/or its affiliates

Autonomous AI Database includes dozens of AI-enhanced Self-Service tools

Nothing else to purchase, install, or configure

Copyright © 2026, Oracle and/or its affiliates

Autonomous AI Database adds your Private Data to AI Models

Reasoning across both public & private data delivers highest value results

How is your share of wallet trending with top accounts?

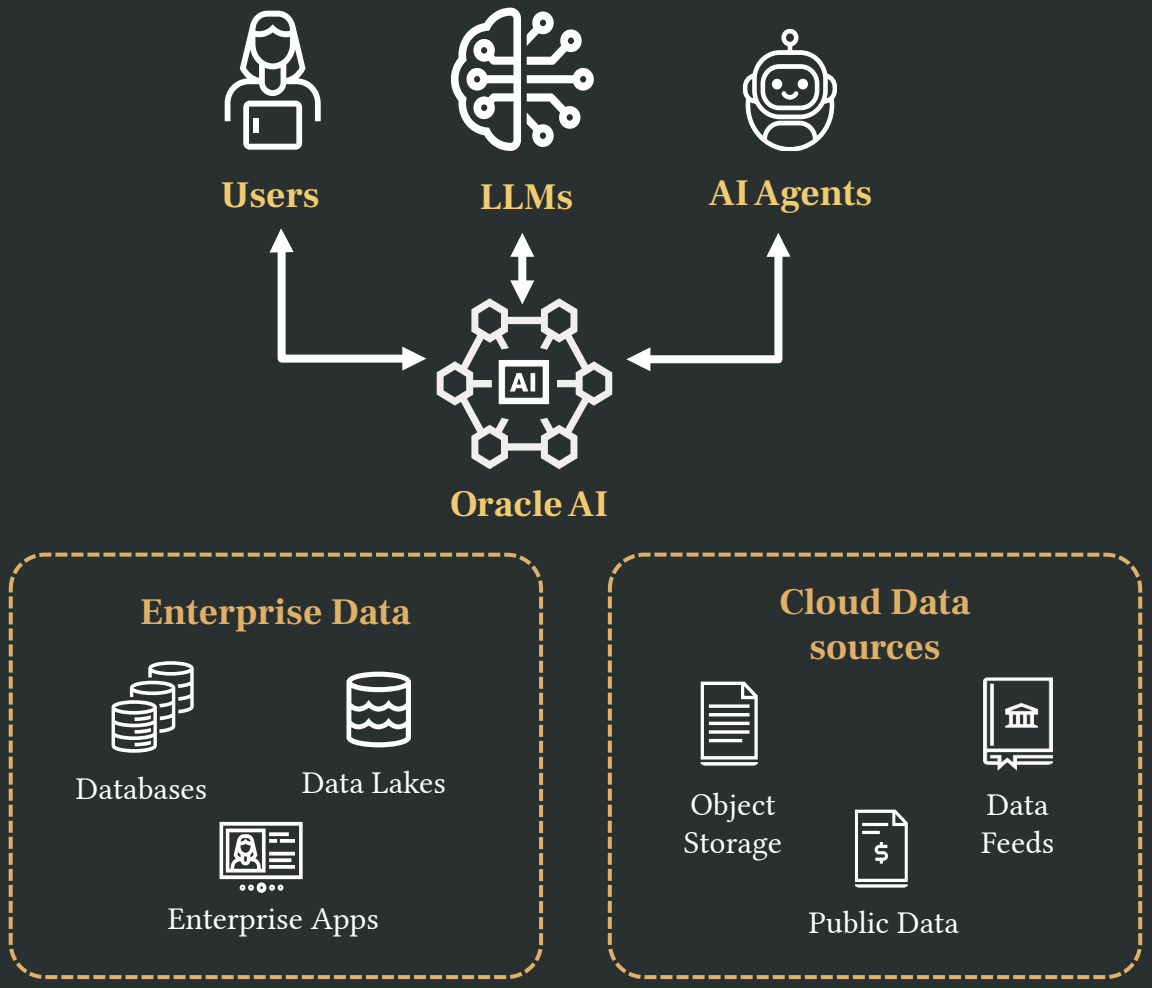

***Enterprise Data*:** Cross-product purchase data

***Cloud Data Sources*:** Updated customer behavior

Which of your customers are most likely to churn?

***Enterprise Data* :** Contract terms, usage metrics, service tickets

***Cloud Data Sources* :** Competitor pricing changes, social sentiment, macro-economic indicators

Copyright © 2026, Oracle and/or its affiliates

Autonomous AI Database supports all leading AI models

And delivers dozens of AI-powered features using these AI models

OCI Generative AI

Cohere

OpenAI

Google

Anthropic

Meta

Grok

Hugging Face

Microsoft

Amazon Bedrock

Mistral AI

Jina AI

Qwen

LAION

AND

Private LLMs

LangChain

ONNX

LangGraph

Pytorch

Ollama

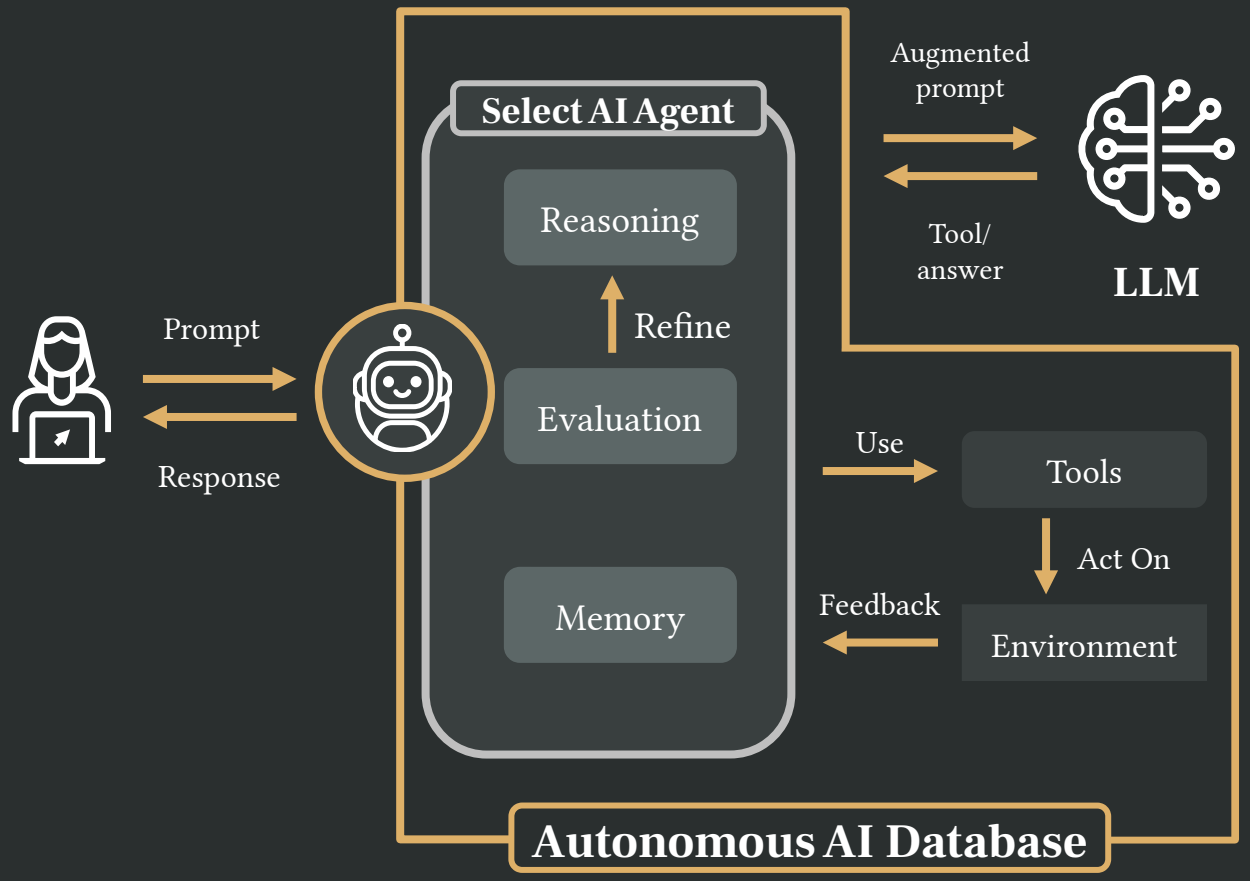

Haystack

TensorFlow

- Select AI Profiles can be customized for each use-case
- Flexibility to easily switch between Select AI Profiles in the same session

Copyright © 2026, Oracle and/or its affiliates

Autonomous AI Database delivers AI Agents using Select AI Agent

AI Agents utilize dynamic multi-step workflows to perceive their environment, process information, make decisions, and take actions to achieve user goals

Simple, automated framework to build, deploy, and manage AI agents

- Automatic short-term and long-term memory management
- Multi-turn chat using conversations
- Built-in and custom tools

Copyright © 2026, Oracle and/or its affiliates

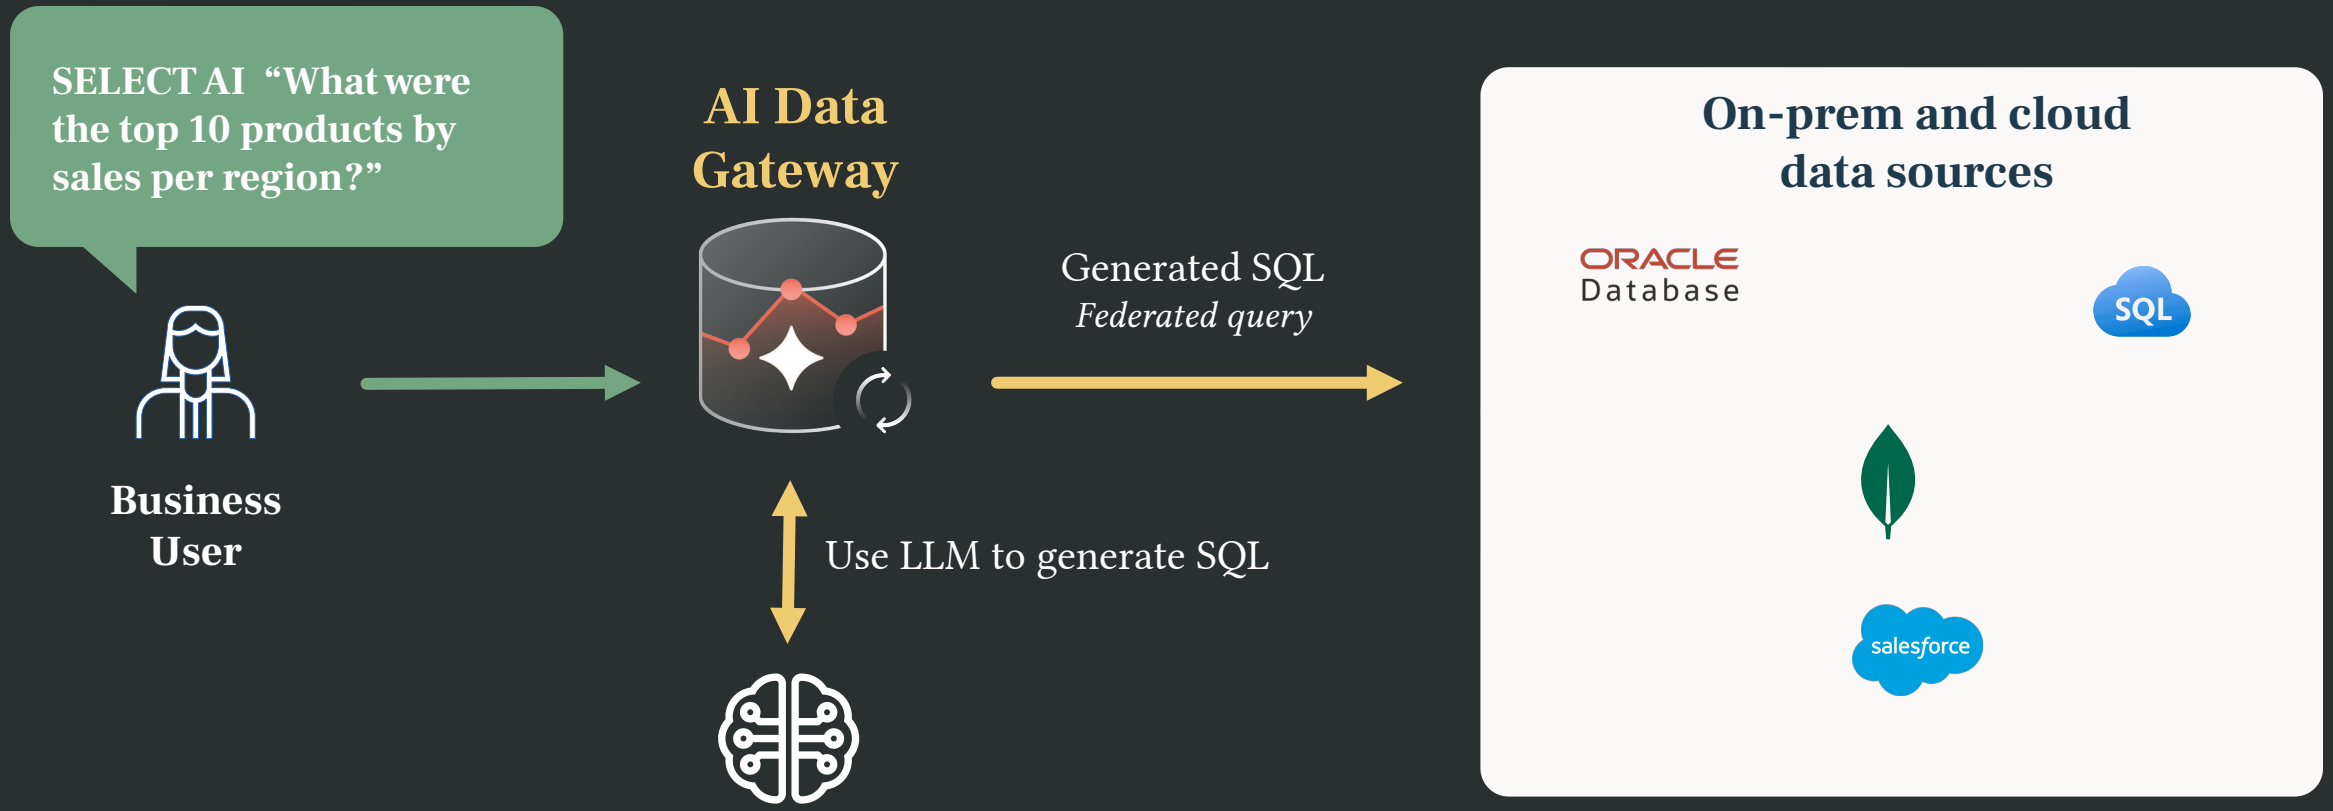

Autonomous AI Database: Data Science Agent demo

Built using Select AI Agent to increase productivity for data scientists and data analysts

Copyright © 2026, Oracle and/or its affiliates

Autonomous AI Database enables Live AI Hub on Oracle and non-Oracle data

Live AI Hub uses AI Data Gateway to create federated queries across multiple data sources

Also enables use of AI on older database versions (19c)

Autonomous AI Database brings powerful Data Studio

Data analytics with self-service data tools

Built-in data load and integration

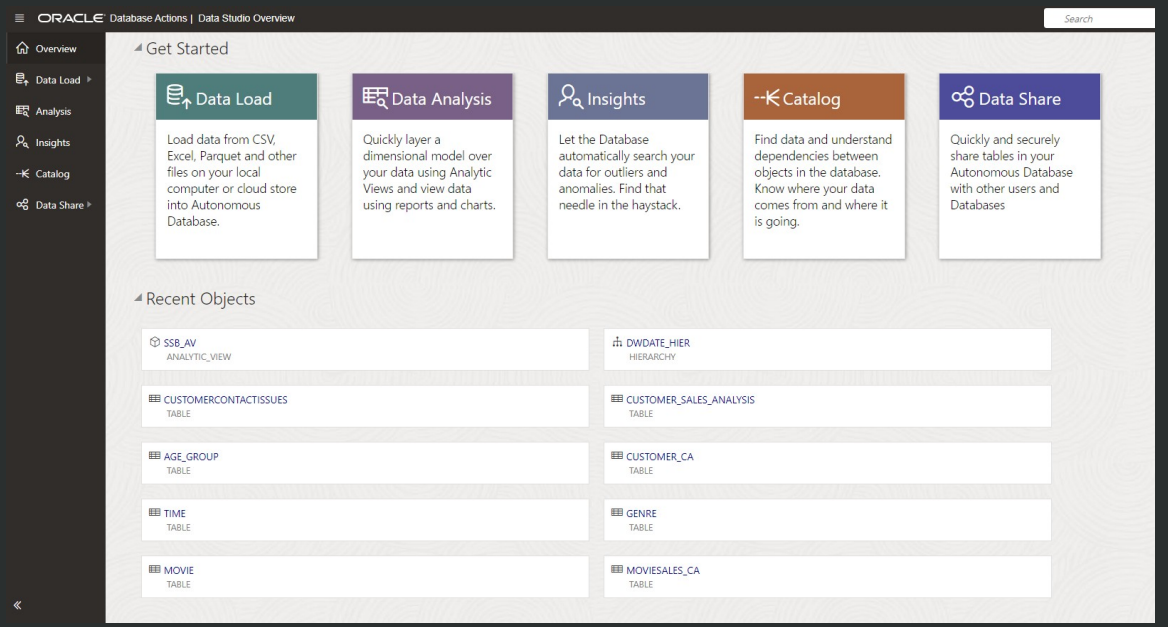

- Load data from virtually anywhere
- Transform and prepare data for analytics with drag-and drop data integration powered by Oracle Data Integrator

Easy data modelling and sharing

- Easily model data for optimized and consistent analytic queries
- Share data securely with other groups, partners and customers

Reduce cost and complexity

- No need to set up or learn another service for data integration
- Autonomously managed alongside the database

Copyright © 2026, Oracle and/or its affiliates

Autonomous AI Database brings Integration to a wide range of environments

Remove complexity with open and complete multicloud support

Distributed data stores

Enable **integration** through out-of-box connectors

Directly access and query data

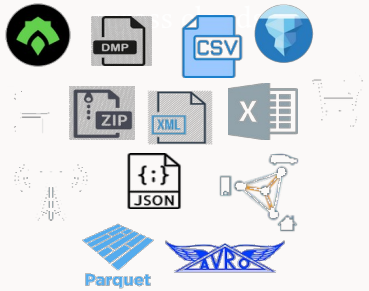

Object stores

Directly access with native cloud access policies

Cloud data types

Securely access

Data catalogs and code repos

Govern data

Integrate with DevOps process

Access data across clouds without coding or extra services

Copyright © 2026, Oracle and/or its affiliates

Agenda

Oracle Autonomous AI Database

- Introduction
- Features and benefits
- Build new modern applications
- Manage all your data
- Conclusions

Autonomous AI Database was released in 2018

Today it powers 1000s of global enterprises for both OLTP and analytic workloads

Copyright © 2026, Oracle and/or its affiliates

Oracle Autonomous AI Database

Run AI and analytics securely on all your data without lock-in

Multicloud

Runs everywhere

Lakehouse without compromises

The openness of Iceberg with the performance, reliability and trust of Oracle

AI for all your data

Built-in AI, analytics, and security across **all** your data

Copyright © 2026, Oracle and/or its affiliates

Key takeaways

Lower costs with one fully automated database

Empower developer community and business teams with AI

Minimize data security and downtime risks via automation

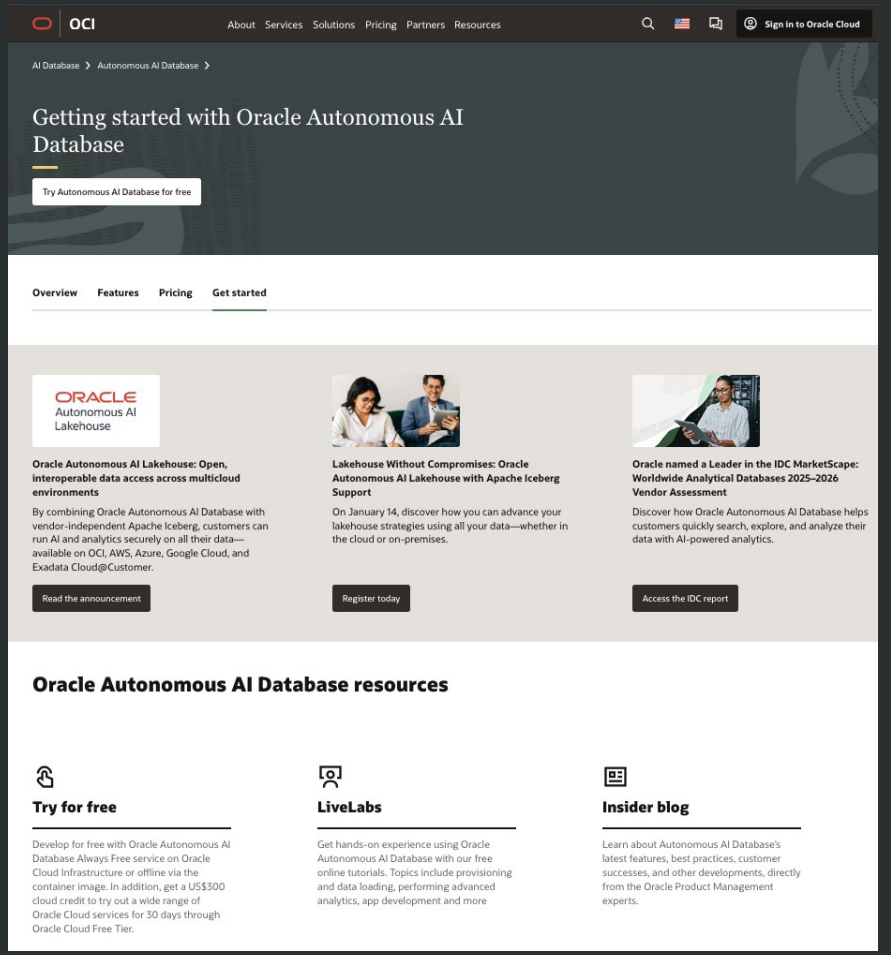

Autonomous AI Database accelerates your innovations

Copyright © 2026, Oracle and/or its affiliates
